

## AUDIO & VISUAL AMENITIES

Located in Assiniboine Park, the Qualico Family Centre will serve as a wedding, banquet and meeting facility available for corporate meetings and private social gatherings.

Bringing your presentation to your audience has never been more professional. The Qualico Family Centre employs the latest Speaker and Audio Amplification technology from Bose, the best Video Projection systems from Panasonic and Christie Digital Systems, and the expertise of Sound Art Canada's Installation and Integration division. Like the building itself, The Integration of the Audio and Visual systems of the Assiniboine Park Qualico Family Centre have been designed with your next event in mind.

### AUDIO CAPABILITIES

There are six distinct audio zones that provide equal aural coverage of each of the centre's meeting areas. These can be digitally combined or separated in any combination, to greet your guests with theme inspired music when they enter the grounds, provide elegant background music during your cocktail reception and reach every person in your audience with crystal clear audio when you deliver your speech. Wireless microphones, music from your own MP3 player or the audio from your computer based presentation can all be broadcast from up to four different locations within the centre.

### VIDEO CAPABILITIES

Video presentation can be accommodated via two large screens that can be mirrored with the same image to reach a larger audience, or operated discreetly for a private function. Broadcasting brilliant color and crystal clear imagery to these screens is a pair of the most advanced digital LCD projectors available in their class. To present a slide show or movie from your computer all you have to do is plug it in. And so that every member of the audience can feel close to the person at the podium, an automated IMAG camera can broadcast a live image on the screens so even the back rows have a good view.
